## **Mom N Baby SmartCare**

### **Executive Summary**

Mom N Baby SmartCare is a mobile application of managing health of mothers and babies. This Software Requirements Specification document describes all the requirements of the system necessary to write the application. It states the purpose of system, user characteristics and requirement identification strategy. It goes ahead to state functional requirements in detail like user registration and login, profile management, mother and baby health tracker, reminders, notifications, records with graphs, settings and logout. It also defines non-functional requirements such as usability, performance, reliability, security, availability, backup and compatibility. It has external interface requirements, use case analysis, and storyboards that explain how the user interacts with the system, system behavior and flow of the screen. The SRS is a complete and structured source of information on designing and implementation of the Mom N Baby SmartCare application.

### **3.1 Requirements Analysis:**

This section provides a detailed analysis of the requirements for the Mom N Baby SmartCare application. The system helps mothers take care of their own health and their babies. Users can create an account, log in, and update their profile. The app tracks health information for mother and baby. It records baby milestones and sets reminders for appointments and vaccinations. The app shows health trends in simple charts. All personal information is kept safe. The system should be easy to use, reliable, and work well on mobile devices. It also gives timely notifications to users.

#### **3.1.1 User classes and characteristics:**

Mom N Baby SmartCare app is designed for one primary user: the **Mother**. She is the central user of the system and interacts with all features shown in the use-case diagram. The table below explains the user class and its characteristics in a clear and simple way.

User Class	User Characteristics
Mother	The mother is the main user of the Mom N Baby SmartCare app. She wants a simple, organized way to take care of her health and her baby's daily needs. The app should be easy to use and help with basic tasks like signing up, logging in, and updating her profile. Every day, she relies on reminders, notifications and a clear home screen to stay organized. She also needs a simple way to record and manage health information for herself and her baby with the ability to view, update, or delete records and log out safely.

#### **3.1.2 Requirement Identifying Technique:**

**Mom N Baby SmartCare** uses a use case based requirement identifying technique to define system requirements. This approach helps in understanding how a mother uses the app in her daily routine and what features the system needs to support.

## **Use Cases:**

Use cases describe the main actions performed by the mother, such as registration, login, profile management, setting reminders, receiving notifications and tracking health information for both mother and baby. The use case diagram shows these interactions clearly, while detailed use case descriptions explain each process step by step.

## **Storyboards:**

Storyboards are used to visually show the flow of screens and user actions within the app. They explain how the mother navigates through different features like the home screen, health trackers and reminders, making the app flow easy to understand.

## **3.2 Functional Requirements:**

The functional requirements of the Mom N Baby SmartCare system explain what the system will do. The requirements are organized by system features. Each functional requirement is uniquely identified to ensure clarity and consistency.

### **1. Registration:**

- The system shall allow the mother to register using a username, email, and password.
- The system shall verify the email before completing registration.
- The system shall require the user to confirm the password to ensure correctness.
- The system shall display an error message for invalid or already registered email.

### **2. Login:**

- The system shall allow the mother to log in using email and password.
- The system shall validate credentials and provide an error message for incorrect email or password.
- The system shall provide a forgot password option if login fails.

### **3. Forgot Password:**

- The system shall allow the mother to reset the password by entering the registered email.
- The system will send an email verifying the reset request.
- The system shall allow the mother to set a new password after verification.

#### **4. Reminder Management:**

- The system shall allow the mother to add, edit, view and delete reminders.
- The system shall notify the mother on the basis of scheduled reminders.

#### **5. Mom N Baby Profile:**

- The system shall allow the mother to add, edit and view her profile and the baby's profile.
- The profile shall include mother's name, age, baby's name, and baby's date of birth.

#### **6. Records & Graphs:**

- The system shall allow the mother to add, edit, view and delete health records.
- The system shall track and display record or graphs for glucose level, blood pressure, weight, and digestion info.

#### **7. Health Schedule:**

- The system shall allow the mother to view, select and deselect health schedule.

#### **8. Settings:**

- The system shall allow the mother to change password, theme and email.
- Changing password shall require entering old password and confirming the new password.

#### **9. Mother Health Tracker:**

- The system shall allow the mother to track her glucose level, blood pressure, weight, and digestion info.
- The system shall allow adding, updating, viewing and deleting health records.

#### **10. Baby Health Tracker:**

- The system shall allow the mother to track the baby's weight, milestones, allergies, and medical records.
- The system shall allow adding, updating, viewing and deleting baby health records.

#### **11. Notifications:**

- The system shall allow the mother to receive notifications about selected health schedules.

- The mother shall be able to view and mark notifications as read.

## 12. Logout:

- The system shall allow the mother to log out securely from the app.

### 3.2.1 Functional Requirements X:

<b>Identifier</b>	FR-1
<b>Title</b>	User Registration
<b>Requirement</b>	The mother shall be able to register an account by providing a username, valid email address, password, and confirmed password. The system shall validate the inputs and send an email verification link upon successful submission.
<b>Source</b>	Project stakeholder
<b>Rationale</b>	Allows secure registration of users and ensures authenticity of the registered email address.
<b>Business Rule (if required)</b>	One email address can be registered with only one account
<b>Dependencies</b>	None
<b>Priority</b>	High

**Table 1: Function Requirements Specification**

<b>Identifier</b>	FR-2
<b>Title</b>	Email Verification
<b>Requirement</b>	Upon registration, the system shall send a verification email to the user and shall

	activate the account only after successful email verification.
<b>Source</b>	Security requirements
<b>Rationale</b>	Ensures account security and prevents unauthorized access.
<b>Business Rule (if required)</b>	Verification link must expire after a defined time period.
<b>Dependencies</b>	FR-1
<b>Priority</b>	High

**Table 2: Function Requirements Specification**

<b>Identifier</b>	FR-3
<b>Title</b>	User Login
<b>Requirement</b>	The registered mother shall be able to log in using a verified email and password. The system shall authenticate credentials and redirect the user to the home screen upon successful login.
<b>Source</b>	Verified Email
<b>Rationale</b>	Provides secure access to the application features.
<b>Business Rule (if required)</b>	Invalid credentials shall result in an error message.
<b>Dependencies</b>	FR-2
<b>Priority</b>	High

**Table 3: Function Requirements Specification**

<b>Identifier</b>	FR-4
<b>Title</b>	Forgot Password
<b>Requirement</b>	The mother shall be able to reset her password by entering her registered email address. The system shall send a verification link and allow password reset after successful verification.
<b>Source</b>	Registered Email
<b>Rationale</b>	Enables account recovery in case of forgotten credentials.
<b>Business Rule (if required)</b>	Password reset must follow email verification.
<b>Dependencies</b>	FR-2
<b>Priority</b>	High

**Table 4: Function Requirements Specification**

<b>Identifier</b>	FR-5
<b>Title</b>	Manage Mother Profile
<b>Requirement</b>	The mother shall be able to add, view, edit, and delete her personal profile information including name, age, and basic details.
<b>Source</b>	Mother
<b>Rationale</b>	Allows personalization and accurate health record maintenance.
<b>Dependencies</b>	FR-3
<b>Priority</b>	High

**Table 5: Function Requirements Specification**

<b>Identifier</b>	FR-6
<b>Title</b>	Manage Baby Profile
<b>Requirement</b>	The mother shall be able to add, view, edit, and delete the baby's profile information including baby name and date of birth.
<b>Source</b>	Mother
<b>Rationale</b>	Enables accurate identification of baby-related health records.
<b>Business Rule (if required)</b>	Baby date of birth must be a valid past date.
<b>Dependencies</b>	FR-3
<b>Priority</b>	High

**Table 6: Function Requirements Specification**

<b>Identifier</b>	FR-7
<b>Title</b>	Mother Health Tracker
<b>Requirement</b>	The system shall allow the mother to add, view, update, and delete her health data including blood pressure, glucose level, weight, and digestion information.
<b>Source</b>	Mother
<b>Rationale</b>	Helps mothers monitor and maintain their health over time.
<b>Dependencies</b>	FR-3, FR-5
<b>Priority</b>	High

**Table 7: Function Requirements Specification**

<b>Identifier</b>	FR-8
<b>Title</b>	Baby Health Tracker
<b>Requirement</b>	The system shall allow the mother to add, view, update, and delete baby health data including weight, allergy information, milestone tracking, and medical records.
<b>Source</b>	Mother
<b>Rationale</b>	Supports systematic monitoring of the baby's growth and health.
<b>Dependencies</b>	FR-3, FR-6
<b>Priority</b>	High

**Table 8: Function Requirements Specification**

<b>Identifier</b>	FR-9
<b>Title</b>	Reminder Management
<b>Requirement</b>	The mother shall be able to add, edit, view, and delete reminders for medicines, feeding schedules, vaccinations, and other care activities.
<b>Source</b>	Mother
<b>Rationale</b>	Ensures timely completion of important health and care tasks.
<b>Dependencies</b>	FR-3
<b>Priority</b>	High

**Table 9: Function Requirements Specification**

<b>Identifier</b>	FR-10
<b>Title</b>	Records and Graphs
<b>Requirement</b>	The system shall display health records and generate visual graphs for mother and baby health data to show trends over time.
<b>Source</b>	Mother
<b>Rationale</b>	Helps users understand health progress through visual representation.
<b>Dependencies</b>	FR-7, FR-8
<b>Priority</b>	Medium

**Table 10: Function Requirements Specification**

<b>Identifier</b>	FR-11
<b>Title</b>	Health Schedule
<b>Requirement</b>	The system shall allow the mother to view, select, and deselect health schedules related to baby care and mother health routines.
<b>Source</b>	Mother
<b>Rationale</b>	Assists in organizing daily and periodic health activities.
<b>Dependencies</b>	FR-3
<b>Priority</b>	Medium

**Table 11: Function Requirements Specification**

<b>Identifier</b>	FR-12
<b>Title</b>	Notifications
<b>Requirement</b>	The system shall send notifications to the mother for reminders, schedule updates, and important health-related alerts.
<b>Source</b>	Mother
<b>Rationale</b>	Keeps the user informed in real time.
<b>Dependencies</b>	FR-9, FR-11
<b>Priority</b>	High

**Table 12: Function Requirements Specification**

<b>Identifier</b>	FR-13
<b>Title</b>	Settings Management
<b>Requirement</b>	The mother shall be able to manage application settings including change email, change password, and change theme. Email and password changes shall require email verification.
<b>Source</b>	Use case diagram
<b>Rationale</b>	Allows secure and personalized account management.
<b>Dependencies</b>	FR-2, FR-3
<b>Priority</b>	Medium

**Table 13: Function Requirements Specification**

<b>Identifier</b>	FR-14
<b>Title</b>	Logout
<b>Requirement</b>	The mother shall be able to securely log out of the application, and the system shall terminate the active session.
<b>Source</b>	Use case diagram
<b>Rationale</b>	Protects user data when the application is not in use.
<b>Dependencies</b>	FR-3
<b>Priority</b>	High

**Table 14: Function Requirements Specification**

### **3.3 Non-Functional Requirements:**

Mom N Baby SmartCare defines quality requirements that explain how the application will work smoothly, safely, and reliably. These requirements focus on system behavior, performance, and user experience rather than features.

#### **Reliability:**

Mom N Baby SmartCare will work reliably during normal use with very few failures. The app shall run for at least 30 days without major failure. If a failure occurs, the system will recover within 5 minutes. Health records, reminders, and profiles will be protected from loss during crashes or unexpected shutdowns. User data shall be backed up automatically once every week, ensuring at least 95% data accuracy and integrity.

#### **Usability:**

Mom N Baby SmartCare will be easy to learn and easy to use for mothers with basic mobile phone knowledge. A new user shall complete registration and login within 5 minutes. Frequent tasks, such as adding baby health information, creating reminders, or accessing records, will be completed with 4 or fewer taps. The interface shall be simple, clear, and designed to reduce user mistakes.

**Performance:**

Mom N Baby SmartCare will perform smoothly during normal operations. Actions such as login, data entry, viewing profiles, and opening health records shall be completed within 3 seconds under normal mobile internet conditions. The app shall run without freezing or noticeable delays during regular use.

**Response Time:**

Mom N Baby SmartCare will respond quickly to user actions. Opening screens, saving data, updating settings and viewing graphs shall take 2 to 3 seconds. Reminders and notifications will be delivered at the correct time in less than 1 minute.

**Security:**

Mom N Baby SmartCare will protect user data from unauthorized access. Only registered and logged in users shall access personal and health information. Important actions such as changing passwords or email addresses will require email verification. User data shall remain private and secure at all times.

**Backup:**

Mom N Baby SmartCare will automatically back up user data after 24 hours.

**Availability:**

Mom N Baby SmartCare will be available 99% of the time. Users shall be informed in advance if the system is temporarily unavailable.

**Maintainability:**

Mom N Baby SmartCare will be built in a modular way so updates, bug fixes and new features shall be added easily without affecting existing functions like health tracking and reminders.

**Compatibility:**

Mom N Baby SmartCare will work properly on common Android devices and shall support different screen sizes, ensuring a consistent and smooth user experience.

**3.4 External Interface Requirements:**

Mom N Baby SmartCare defines external interface requirements to ensure that the application communicates correctly with users and any external software, hardware, or communication services. These requirements describe how users interact with the system and how the system connects with external components.

### **3.4.1 User Interface Requirements:**

- Mom N Baby SmartCare provides a simple, clean, and user-friendly interface designed for mothers with basic smartphone knowledge. The application follows standard mobile user interface guidelines to ensure consistency and ease of use.
- Mom N Baby SmartCare uses clear fonts, readable text size, simple icons, and meaningful button labels. The color scheme is soft and comfortable for long usage and images are relevant and easy to understand.
- Mom N Baby SmartCare supports common screen sizes and resolutions, ensuring proper layout on different Android devices. Standard navigation elements such as home, back, save and logout options are available where needed.
- Mom N Baby SmartCare displays clear messages for actions such as successful login, data saved, errors or reminders. Error messages are simple and guide users on how to fix mistakes.
- Mom N Baby SmartCare designs screen layouts in a consistent way to support future localization and easy understanding. The interface considers accessibility by using readable fonts and clear contrast for better visibility.

### **3.4.2 Software Interfaces:**

- Mom N Baby SmartCare interacts with external software components to support its functionality. The application connects with a backend server and database to store user profiles, baby information, health records, reminders and notifications.
- Mom N Baby SmartCare runs on the Android operating system and uses standard Android libraries and services. It can be combined with notification services to provide users with reminders and alerts.

### **3.4.3 Hardware Interfaces:**

Mom N Baby SmartCare operates on standard Android smartphones and tablets. The application uses device hardware such as touch screens for user input and internal storage for temporary data handling. Normal operation does not require any external special hardware.

### **3.4.4 Communication Interfaces:**

- Mom N Baby SmartCare uses internet connectivity through mobile data or Wi-Fi to communicate with servers for authentication, data storage, backup and notifications.
- Mom N Baby SmartCare supports email communication for user verification, password recovery, and important system messages. Standard web and network protocols are used to ensure secure and reliable communication.

### **3.5 Use Case Analysis:**

Mom N Baby SmartCare use case analysis explains how users interact with the system to achieve specific goals. Each use case describes the purpose, flow, and conditions of a particular system function.

#### **Use Case #1: User Registration and Login**

<b>UC Identifier</b>	UC1
<b>Requirements Traceability</b>	FR-Registration, FR-Login, FR-Email Verification
<b>Purpose</b>	Mom N Baby SmartCare allows a mother to create an account and log in to use the application.
<b>Priority</b>	High
<b>Preconditions</b>	User has a valid email address and internet connection.
<b>Postconditions</b>	User is logged in and redirected to the home screen.
<b>Actors</b>	Mother
<b>Extends</b>	Forgot Password
<b>Includes</b>	Verify Email
<b>Main Success Scenario</b>	<ol style="list-style-type: none"><li>1. Mother opens the app.</li><li>2. Mother chooses Register or Login.</li><li>3. Mother enters email and password.</li></ol>

	4. System verifies the details. 5. System logs in the user and shows home screen.
<b>Alternate Flows</b>	User chooses Forgot Password.
<b>Exceptions</b>	Invalid email, wrong password, no internet.

Table 15: Use Case Description for Registration and Login

### Use Case #2: Forgot Password

Item	Description
<b>UC Identifier</b>	UC2
<b>Requirements Traceability</b>	FR-Forgot Password
<b>Purpose</b>	Mom N Baby SmartCare allows the user to reset a forgotten password.
<b>Priority</b>	High
<b>Preconditions</b>	User is registered and has access to email.
<b>Postconditions</b>	Password is successfully updated.
<b>Actors</b>	Mother
<b>Extends</b>	None
<b>Includes</b>	Verify Email
<b>Main Success Scenario</b>	1. Mother selects Forgot Password. 2. Mother enters email. 3. System verifies email. 4. Mother enters new password. 5. System updates password.
<b>Alternate Flows</b>	Email verification delayed.
<b>Exceptions</b>	Invalid email, verification failed.

Table 16: Use Case Description for Forgot Password

### Use Case #3: Manage Mom and Baby Profile

<b>UC Identifier</b>	UC3
<b>Requirements Traceability</b>	FR-Profile Management
<b>Purpose</b>	Mom N Baby SmartCare allows the mother to view and edit mom and baby profile details.
<b>Priority</b>	High
<b>Preconditions</b>	User is logged in.
<b>Postconditions</b>	Profile information is saved successfully.
<b>Actors</b>	Mother
<b>Extends</b>	None
<b>Includes</b>	View Profile, Edit Profile
<b>Main Success Scenario</b>	<ol style="list-style-type: none"> <li>1. Mother opens profile section.</li> <li>2. System displays mom and baby details.</li> <li>3. Mother edits information.</li> <li>4. System saves updated profile.</li> </ol>
<b>Alternate Flows</b>	Mother only views profile.
<b>Exceptions</b>	Missing required data.

Table 17: Use Case Description for Manage Mom N Baby Profile

### Use Case #4: Mother Health Tracking

<b>UC Identifier</b>	UC4
<b>Requirements Traceability</b>	FR-Mother Health Tracker
<b>Purpose</b>	Mom N Baby SmartCare allows the mother to record and track her health details.
<b>Priority</b>	High
<b>Preconditions</b>	User is logged in.
<b>Postconditions</b>	Health data is saved and viewable.
<b>Actors</b>	Mother
<b>Extends</b>	None
<b>Includes</b>	Add, View, Update and Delete Health Data
<b>Main Success Scenario</b>	<ol style="list-style-type: none"> <li>1. Mother opens Mother Health Tracker.</li> <li>2. Mother adds health details (weight, BP, glucose).</li> <li>3. System saves data.</li> </ol>
<b>Alternate Flows</b>	Mother edits or deletes existing data.
<b>Exceptions</b>	Invalid data entry.

Table 18: Use Case Description for Mother Health Tracking

### Use Case #5: Baby Health Tracking

<b>UC Identifier</b>	UC5
<b>Requirements Traceability</b>	FR-Baby Health Tracker
<b>Purpose</b>	Mom N Baby SmartCare allows the mother to manage baby health records.
<b>Priority</b>	High
<b>Preconditions</b>	User is logged in and baby profile exists.

<b>Postconditions</b>	Baby health data is saved.
<b>Actors</b>	Mother
<b>Extends</b>	None
<b>Includes</b>	Allergy Information, Weight, Milestones, Medical Records
<b>Main Success Scenario</b>	<ol style="list-style-type: none"> <li>1. Mother opens Baby Health Tracker.</li> <li>2. Mother adds health information.</li> <li>3. System saves records.</li> </ol>
<b>Alternate Flows</b>	Mother updates or deletes records.
<b>Exceptions</b>	Missing or incorrect data.

Table 19: Use Case Description for Baby Health Tracking

### Use Case #6: Reminder Management

<b>UC Identifier</b>	UC6
<b>Requirements Traceability</b>	FR-Reminders
<b>Purpose</b>	Mom N Baby SmartCare allows the mother to manage reminders.
<b>Priority</b>	Medium
<b>Preconditions</b>	User is logged in.
<b>Postconditions</b>	Reminder is saved or updated.
<b>Actors</b>	Mother
<b>Extends</b>	None
<b>Includes</b>	Add, Edit, Delete Reminder
<b>Main Success Scenario</b>	<ol style="list-style-type: none"> <li>1. Mother opens reminders.</li> <li>2. Mother adds reminder.</li> <li>3. System schedules notification.</li> </ol>
<b>Alternate Flows</b>	Reminder edited or deleted.
<b>Exceptions</b>	Invalid date or time.

Table 20: Use Case Description for Reminder

### Use Case #7: Notifications

<b>UC Identifier</b>	UC7
<b>Requirements Traceability</b>	FR-Notifications
<b>Purpose</b>	Mom N Baby SmartCare notifies the mother about reminders and updates.
<b>Priority</b>	Medium
<b>Preconditions</b>	Notifications are enabled.
<b>Postconditions</b>	Notification is shown or marked as read.
<b>Actors</b>	Mother
<b>Extends</b>	None
<b>Includes</b>	View Notification
<b>Main Success Scenario</b>	<ol style="list-style-type: none"> <li>1. System sends notification.</li> <li>2. Mother views it.</li> <li>3. Mother marks it as read.</li> </ol>
<b>Alternate Flows</b>	Notification ignored.
<b>Exceptions</b>	Notification delivery failure.

Table 21: Use Case Description for Notifications

### Use Case #8: Settings Management

<b>UC Identifier</b>	UC8
<b>Requirements Traceability</b>	FR-Settings
<b>Purpose</b>	Mom N Baby SmartCare allows the mother to change app settings.
<b>Priority</b>	Medium
<b>Preconditions</b>	User is logged in.
<b>Postconditions</b>	Settings are updated successfully.
<b>Actors</b>	Mother

<b>Extends</b>	None
<b>Includes</b>	Change Password, Change Email, Change Theme
<b>Main Success Scenario</b>	<ol style="list-style-type: none"> <li>1. Mother opens settings.</li> <li>2. Mother updates preferences.</li> <li>3. System saves changes.</li> </ol>
<b>Alternate Flows</b>	User cancels changes.
<b>Exceptions</b>	Wrong old password.

Table 22: Use Case Description for Settings

### Use Case #9: Logout

<b>UC Identifier</b>	UC9
<b>Requirements Traceability</b>	FR-Logout
<b>Purpose</b>	Mom N Baby SmartCare allows the mother to safely exit the application.
<b>Priority</b>	Low
<b>Preconditions</b>	User is logged in.
<b>Postconditions</b>	User session ends.
<b>Actors</b>	Mother
<b>Extends</b>	None
<b>Includes</b>	None
<b>Main Success Scenario</b>	<ol style="list-style-type: none"> <li>1. Mother selects logout.</li> <li>2. System ends session.</li> </ol>
<b>Alternate Flows</b>	None
<b>Exceptions</b>	None

### 3.8 Summary:

Mom N Baby SmartCare SRS describes the requirements of a mobile application that supports mothers in managing their own health and their babies' health in a single platform. It explains system features such as user registration, secure login, profile management, mother and baby health tracking, reminders, notifications, records with graphs, and settings management. The document also defines non-functional requirements, including usability, performance, reliability, security, and availability, to ensure smooth and safe operation of the application. Use cases and storyboards are included to clearly show user interactions and system behavior, providing a strong foundation for developing a simple, organized, and dependable health management application for mothers and babies.
